MASTER'S IN BIOMANUFACTURING & BIOPROCESSING

1

This **one-year/33 credit** program is suited to the needs of traditional students and working professionals through a blend of in-person/online and days/nights/weekends instruction

2

Innovative master's program combines a foundation in bioprocessing and biomanufacturing theory with practical hands-on laboratory experience.

3

Gain understanding of cGMP systems to assure proper design, monitoring, and control over manufacturing processes and facilities in biopharma

4

Internships with industry leaders give students invaluable experience and serve as a proven pathway into the profession

5

Master's in Biomanufacturing and Bioprocessing prepares students for entry into these growing sectors

- Pharmaceutical companies
- Contract manufacturers
- Contract research orgs (CRO's)
- Biotech companies
- Equipment manufacturers
- Reagent suppliers

6

ACPHS is ideally located between global biopharmaceutical hubs – Boston, Montreal, NYC, and Toronto
