

MASTER'S DEGREE IN BIOMANUFACTURING AND BIOPROCESSING

Gain the knowledge and real-world training to make an impact in the biopharmaceutical industry

STACK FAMILY
CENTER FOR BIOPHARMACEUTICAL
EDUCATION AND TRAINING

ACCELERATED M.S. PROGRAM

Biomanufacturing and Bioprocessing are used to generate and refine biopharmaceuticals (medicines from biological sources)

ABOUT

- 33-credit
- 180+ hours of lab-focused training coupled with in-person, asynchronous, and live-stream courses
- **Tracks**
 - Full-time
 - Part-time
 - Pursue as part of a dual-degree program (e.g., with PharmD.)

- Gain real-world experience working with microbial and mammalian cells from frozen cell banks through scaling up to bioreactors
- Real-world experience in downstream purification and analysis of biologics
- **Borisenok Family Foundation Scholarship** also provides financial-need-based tuition assistance
