RESEARCH

THE CBET ADVANTAGE

Expertise from leading researchers, scientists and subject matter experts.

Customization to meet your specific needs and objectives.

Comprehensive Guidance from project planning and design through data collection, analysis and reporting.

Multidisciplinary Approach delivering broad perspectives, insights and expertise.

Proven Track Record of results using our advance knowledge in biomanufacturing and bioprocessing.

Client-Centric Focus to forge a strong long-lasting partnership with your team.

Your Proving Ground
for Early Ideas

ACCELERATE SCIENTIFIC DISCOVERY

Why outsource research and development?

END-TO-END SOLUTIONS

Utilizing contract services for early-stage projects is the fastest and most affordable way to streamline research and immediately add cutting-edge resources and expertise to your team.

Whether you need to scale a cell line into a bioreactor or collect data for a novel technology, our purpose-built bioprocessing center delivers results across the biomanufacturing continuum.

- Upstream and downstream labs equipped with industry-grade technologies
- Single-use and traditional systems capable of batch, continuous, and perfusion processes
- Extensive array of equipment

Fast-track your latest technologies with CBET

“CBET’s seamless collaboration and rapid results helped us achieve key objectives, making them an indispensable asset to our biotechnology ventures.”

— HANNY KANAFANI, PHD. PRESIDENT AND COO AT TRAIT BIOSCIENCES INC.

CONTRACT SERVICES

UPSTREAM PROCESSING

Robust inoculum | Reliable biomanufacturing

- Mammalian and insect cell culture
- Microbial fermentation
- Adenovirus and lentivirus production
- Scale-up studies
- Media optimization
- Cloning and cell line selection

DOWNSTREAM PROCESSING

Streamlined recovery and purification

- Cell lysis and clarification
- Tangential flow filtration
- Protein purification
- Lyophilization

ANALYTICS

Unmatched quality results

- | | |
|---------------------|-----------------------------|
| ■ Assay development | ■ Western blotting / ELISAs |
| ■ Endotoxin testing | ■ PCR / RT-PCR / qPCR |
| ■ UPLC-DAD and FLD | ■ Automated microscopy |

OUR TEAM IS READY

Let's achieve your research goals together.

“CBET performed crucial testing to evaluate the performance of our equipment and provided meaningful data across various applications for which our technology may be used. From the initial consultation to the final deliverables, their team demonstrated professionalism, expertise, and dedication that exceeded our expectations.”

— CARR BIOSYSTEMS
